## GET TO KNOW STUDENT AFFAIRS

## Meet Network Support

The Network Support department ensures that all areas in Student Affairs are equipped with technology and software that is necessary for everyday functions. The network support team prioritizes the solutions to any problems while maintaining systems up to date. Services range from network infrastructure operations, desktop support, server-side applications, security roles, and many other various IT applications. Although we are housed in Student Affairs, our role has been to operationalize the "One U" mission by supporting partner areas that are located within common locations.

### EMPLOYEE SPOTLIGHT JEREMY BURNS

Meet Jeremy! Jeremy is a Network Administrator in Network Support. In his role, Jeremy assists with network, server, and upfront support within various departments. Six years ago, Jeremy decided to apply to an open position in network support after Hayden Waters shared this great opportunity. Since then, Jeremy has gained new applied skills different from his ITT Tech degree in programming. Although Jeremy received a degree in another field of study, he has developed professionally at the U by helping in a diverse set of projects requiring a critical look at the technological systems. For example, one of Jeremy's favorite projects was problem-solving efficiently while the Network Support team facilitated the migration of servers from the main campus to the data center. During the past year, the focus was on ensuring a smooth transition with staff working from home. Now, Jeremy is looking forward to dedicating time to exciting projects that will continue to improve the accessibility to software and tools for staff at the U.
