- 64.81% strongly agreed that they felt confident about the accuracy of the information they received while 31.48% agreed and 1 person strongly disagreed.

### **Actions Taken:**

Based on the findings, the breakout sessions were successful and relevant. We have continued this format. We have also added tabling session during lunch so the counselors can meet with more departments and colleges on campus. We moved the conference to the union because of space, which was one of the main concerns of this conference. We decided not include the student panel this year based on the percentage of people that did not think it was excellent or good.
