Goal and desired outcomes of the program or service:
To provide special programming child care activity that occurs outside the typical child care needs. This weekend event supports student family’s health and well-being outside of typical class and study times.

Goal of assessment:
To assess the success of the Parent Night Out program, which pays for child care costs one night per month for student parents.

Population sampled:
Student parents using the program.

How many people were asked (if known)? 251
Respondents: 74
Response Rate: 29%
Administration Type: Department-sent e-mail

Summary of Key Findings
Yes, we were able to determine the success of Parent Night out thanks to a substantial survey response. More than 97% or respondents were satisfied with this program, 98% found it very-to-extremely helpful, and 100% would use the service again. The response data, along with many warm comments, provides clear evidence that this program is successfully serving a student need.

Actions Taken/Planned based on the findings from this assessment:
To continue providing Parent Night Out events once per month for 10 of 12 calendar months.

Alignment
Student Affairs Key Activity: [still in process]
Departmental Key Activity: Special Programming
**Departmental goal this project addresses:** KA2 Provide special programming child care activities that occur outside the typical child care needs to help support student family’s health and well-being outside of typical class and study times. Increase the number of Parent Night Out programs that provide student parents access to free child care one night per month to include summer months, for a total of 10 PNO events per year.

**Student Affairs Learning Domain Connection:** *Campus Community*
